

Improve this doc (<http://github.com/ionic-team/ionic-native/edit/master/src/@ionic-native/plugins/document-viewer/index.ts#L29>)

Document Viewer

This plugin offers a slim API to view PDF files which are either stored in the apps assets folder (/www/*) or in any other file system directory available via the cordova file plugin.

Repo: <https://github.com/sitewaerts/cordova-plugin-document-viewer> (<https://github.com/sitewaerts/cordova-plugin-document-viewer>)

✎ Installation

1. Install the Cordova and Ionic Native plugins:

```
$ ionic cordova plugin add cordova-plugin-document-viewer
$ npm install --save @ionic-native/document-viewer
```

2. Add this plugin to your app's module (https://ionicframework.com/docs/native/#Add_Plugins_to_Your_App_Module)

✎ Supported platforms

- Android
- iOS
- Windows

✎ Usage

```
import { DocumentViewer } from '@ionic-native/document-viewer';

constructor(private document: DocumentViewer) { }

...
const options: DocumentViewerOptions = {
  title: 'My PDF'
}

this.document.viewDocument('assets/myFile.pdf', 'application/pdf', options)
```
