Apache® TPLIF System

The *Apache* TPLIF System consists of precision instruments and PEEK Optima® implants for aiding in fusion of the lumbar spine. The combination of PEEK Optima® and tantalum markers allows surgeons to have an enhanced view of implant placement during surgery and vertebral fusion post surgery.

1. Large graft window

2. Aggressive tooth pattern resists implant migration.

3. Tantalum markers

4. Self-distracting

5. Increased wall thickness for structural support

6. Threaded inserter allows for quick capture and stable insertion.
